RE: Price Increase Implementation September 1st, 2022
90 Day Notice

Dear Valued Partners,

On September 1st, 2022 Champion and Bi-Line Conveyors will be implementing a price increase. Due to continued inflation, we continue to see our cost rise beyond what we can mitigate. The conflict in Ukraine has exacerbated pressures on stainless steel, our main component in our dishwashers. Champion has and will continue to strive to find relief in the supply chain, but a price increase is necessary to offset the dramatic increases we are seeing. We have been paying a premium on many items to maintain competitive lead times on our equipment while ensuring the necessary quality.

The increase will average 9% across our product lines.

Even with this increase, you will find that Champion is still in a very competitive pricing situation in the warewashing market. We continue to strive to be the Total Dish Room Solution Company for you and your valued customers.

Please let us know if you have any questions regarding the increase and we thank you for your support.

Best Regards,

Jay Bravinder
Vice President of Sales
